*KPMG Malaysia*
11/2022

## Professional Experience

**Full Stack Developer** — 10/2023 – present
*Chingu* — Malaysia
- Utilizing **agile methodologies** to manage projects and ensure on-time delivery.
- Actively participating in weekly sprints for **progress updates, issue identification, and solution brainstorming**.
- **Collaborating** with team remotely to develop and launch our full-stack projects, utilizing technologies such as TypeScript, NextJS, ORM, PlanetScale, HTML5 and Tailwind CSS.

**Senior Consultant, Finance Shared Services and Outsourcing** — 04/2023 – 08/2023
*KPMG* — Malaysia
- Successfully **implemented a global shared services** setup for a pharmaceutical company, managing the entire RM2.5 million project life cycle.
- Facilitated and led PPLS service line meetings and workshops as needed, often involving **cross-functional teams** at the global and/or regional level.
- Assisted a cash management industry in **implementing Microsoft Power Automate ideas** for financial automation processes.

**Consultant, Payroll Outsourcing** — 05/2023 – 03/2023
*KPMG* — Malaysia
- **Efficiently** process payroll for compliance with all regulations, encompassing **end-to-end payroll management** for 800 employees. Services include statutory registration, precise calculation and timely payment of salaries and contributions and overtime.

**Senior Consultant, Payroll Outsourcing** 07/2022 – 03/2023
*KPMG* Malaysia

- Software administrator: maintaining the payroll software up to date and **troubleshooting problems** together with the payroll teams.
- **Implemented Payroll setup** for outsourcing client's payroll processes which includes system and functionality evaluation, customization and data migration.
- Oversaw bank reconciliation, internal billing and invoicing to clients and vendors.
- **Ensured client happiness** by designing a standard workflow, answering questions, troubleshooting issues and providing them with the right access to our services.
- Assisted in **payroll audit** by assessing the accuracy of an energy industry's payroll liabilities (e.g. reviewed MTD/EPF calculation, payroll wage codes, social security obligations) and proposed potential recommendations for the company to optimise control of Payroll related processes.

**Consultant, Governance & Sustainability** 09/2021 – 11/2021
*KPMG* Malaysia

- Contributed to **bringing new clients** by developing targeted proposals and training programs (e.g Sustainable Finance, Climate Change, Human Rights).
- Increased changes of success for our product by running competitor analysis: performed **benchmarking client companies against leading firms from various sectors**, including property, pharmaceutical, real estate investment trust and large conglomerates based on sustainability frameworks and guideline (FTSE4Good, GRI, DJSE, UN SDGs).
- Supported a comprehensive forced labor assessment of a palm oil plantation in accordance with International Labour Organization (ILO) guidelines, **contributing to the identification and mitigation of labor exploitation risks**.

**Product Actuarial Analyst** 04/2020 – 01/2021
*Global Atlantic Financial Group* United States

- Developed key story improved the process of life insurance management by conducting thorough research on premium and underwriting calculations, resulting in valuable contributions towards **process enhancements**.
- Ensured **clear communication with internal and external clients** by designing and maintaining product data.

**Student Assistant** 01/2018 – 05/2019
*Drake University International Center* United States

- **Supported students' growth** by connecting them with various University departments, helping them with administrative duties and evaluating their assessment tests during orientation programs.

**Forensics Consulting Intern** 06/2018 – 08/2018
*PricewaterhouseCoopers* Malaysia

- Assisted in audit and consulting within the Forensics Department in order to **identify, mitigate and reconcile fraudulent accounting** for companies in various industries (e.g. airlines, real estate, retail).
- Placed for crossover between 3 services lines: Data Analytics, Global Intelligence Operations Center and Core Services.
- Conducted research (e.g. cost analysis, etc.), compiled data, prepared reports and presentations for clients related to **mobile relativity** (i.e. data extraction from technology software) and **forensics imaging**.
- Involved in projects on cyber threat management and cyber incident response.

**Financial Operations Analyst** 07/2016 – 05/2017
*Global Atlantic Financial Group* United States

- **Prevented discrepancies in premium payments** by tracking daily reports.
- Improved work process by automating the process and eliminating errors which led to **saving 10 hours of work per week**.
- Trained and mentored new team members on the day-to-day process.

**Constituent Assistant Intern** 01/2016 – 04/2016
*Iowa Center for Economic Success* United States

- **Prepared tax returns for low-income individuals** through VITA (Volunteer Income Tax Assistance) Certification, ensuring access to tax benefits and financial resources.

## Projects

**ChatGPT-clone**
*A ChatGPT-clone for enhanced communication and information retrieval.*
- Enhances performance with server-side rendering, utilizing the advanced OpenAI GPT-4.0 model for dynamic and interactive chat experiences.
- Built with NextJS, Axios, Postman.

**Page Pocket**
*An intuitive bookmarking app for gathering and organizing your favorite websites and shortcuts.*
- Expertise in categorisation and tagging ensures that the retrieval of specific links is seamlessly organized and efficient.
- Built with TypeScript, NextJS, ORM, PlanetScale, Postman.

**Friendly Food Finder**
*An allergen-friendly app where people can find their favorite allergen-friendly restaurants worldwide and save them.*
- Main features: with user authentication, favorite restaurant saving, and PDF download capabilities.
- Integrated APIs such as Google Translation, React Email, and Google Places to enhance user experience.
- Built with React, NodeJS, ExpressJS, JSON Web Token, Bcrypt, React Hooks, mySQL, Postman.

**MedApp**
*A medication management app designed for individuals to adhere to their medication schedule.*
- Implemented features on top of an existing application: medication reminders, distinct views, time and date display, close, edit, and update buttons for medical cards.
- Built with VueJS, NodeJS, ExpressJS, mySQL, Postman.

**Ezform**
*A method for employers to streamline the onboarding and payroll processing procedures.*
- Facilitating seamless access to information within a unified platform for enhanced ease in payroll processing.
- Removing the need for manual scanning and submission of onboarding forms.
- Built with React, NodeJS, ExpressJS, React Hooks, mySQL, Postman.
